Lumache (/lu'make/) is a Python library for cooks and food lovers that creates recipes mixing random ingredients. It pulls data from the [Open Food Facts database](#) and offers a *simple* and *intuitive* API.

Check out the [*Usage*](#) section for further information, including how to [*Installation*](#) the project.

Note: This project is under active development.

CONTENTS

1.1 Usage

1.1.1 Installation

To use Lumache, first install it using pip:

```
(.venv) $ pip install lumache
```

1.1.2 Creating recipes

To retrieve a list of random ingredients, you can use the `lumache.get_random_ingredients()` function:

`lumache.get_random_ingredients(kind=None)`

Return a list of random ingredients as strings.

Parameters

`kind (list[str] or None)` – Optional “kind” of ingredients.

Raises

`lumache.InvalidKindError` – If the kind is invalid.

Returns

The ingredients list.

Return type

`list[str]`

The `kind` parameter should be either “meat”, “fish”, or “veggies”. Otherwise, `lumache.get_random_ingredients()` will raise an exception.

`exception lumache.InvalidKindError`

Raised if the kind is invalid.

For example:

```
>>> import lumache
>>> lumache.get_random_ingredients()
['shells', 'gorgonzola', 'parsley']
```

1.2 API

lumache

Lumache - Python library for cooks and food lovers.

1.2.1 lumache

Lumache - Python library for cooks and food lovers.

Functions

get_random_ingredients([kind])

Return a list of random ingredients as strings.

Exceptions

InvalidKindError

Raised if the kind is invalid.

Lumache has its documentation hosted on Read the Docs.

Lumache has its documentation hosted on Read the Docs 2.

Lumache has its documentation hosted on Read the Docs 3.
